21 VERIFIED AI VOICE QUERIES & IMMEDIATE ANSWERS

Demonstration Guide for College Professor & Live Academic Evaluation

This guide contains 21 verified questions you can ask the Jain Pay AI Voice Assistant aloud. Every question executes deterministic, read-only SQL against our live 12-table Boyce-Codd Normal Form (BCNF) database, providing immediate verbal and on-screen answers with zero hallucination or model delay.

TOP 5 QUESTIONS TO ASK IN FRONT OF YOUR PROFESSOR

[Q01 • PAYMENT EXTREMES] Tables: transactions, ledger_entries Key: Max Outgoing: ¹1,640.00 (BES

Q01: "What was my maximum payment?"

Immediate Reply: "Your maximum outgoing payment is 1,640 rupees paid to BESCOM Electricity on October 22, 2026 with status SUCCESS. Including incoming transfers, your largest overall transaction is the 5,000 rupee credit from the ACM Campus Hackathon Stipend on October 14, 2026."

```
SQL: SELECT transaction_id, counterparty_name, amount, status FROM transactions ORDER BY amount DESC LIMIT 2;
```

[Q02 • PAYMENT EXTREMES] Tables: transactions, ledger_entries Key: Min Settled: ¹500.00 (VIT Hac

Q02: "What was my minimum payment?"

Immediate Reply: "Your minimum completed outgoing payment is 500 rupees paid to VIT HackVerse Registration on October 21, 2026. Your smallest attempted outgoing payment is 340 rupees to Blue Tokai Coffee Roasters on October 23, and the smallest overall transaction in your passbook is the 45 rupee LinUCB cashback credit on October 19, 2026."

```
SQL: SELECT transaction_id, counterparty_name, amount, status FROM transactions ORDER BY amount ASC LIMIT 3;
```

[Q03 • PASSBOOK & SETTLEMENT] Tables: transactions, ledger_entries Key: Last Settled: ¹1,640.00 (2026

Q03: "What was my last payment?"

Immediate Reply: "Your last completed payment was 1,640 rupees to BESCOM Electricity on October 22, 2026 at 18:20 UTC. Your latest initiated transaction was 340 rupees to Blue Tokai Coffee Roasters on October 23, 2026, which is currently in processing status with zero rupees debited."

```
SQL: SELECT transaction_id, counterparty_name, amount, status, reference_utr, created_at FROM transactions ORDER BY created_at DESC LIMIT 2;
```

[Q04 • PASSBOOK & SETTLEMENT] Tables: transactions, ledger_entries Key: Earliest Credit: ¹5,000.00 (20

Q04: "What was my first or earliest transaction?"

Immediate Reply: "Your earliest recorded transaction was the 5,000 rupee credit from the ACM Campus Hackathon Stipend on October 14, 2026, and your first outgoing payment was 1,299 rupees to Amazon India Marketplace on October 16, 2026 for a Keychron PBT Keycap Set."

```
SQL: SELECT transaction_id, counterparty_name, tx_type, amount, created_at FROM transactions ORDER BY created_at ASC LIMIT 2;
```

[Q05 • AUTOPAY & BILLING DATES] Tables: autopay_mandates, transactions Key: Next Debit: 2026-10-26 (BESC

Q05: "On what date should my next payment be implemented?"

Immediate Reply: "Your next scheduled payment date is October 26, 2026 for BESCOM Smart Meter AutoPay up to 2,500 rupees, followed by October 29, 2026 for JioFiber Postpaid Broadband up to 1,200 rupees, and November 5, 2026 for GitHub Copilot Pro up to 850 rupees."

```
SQL: SELECT merchant_name, max_debit_amount, frequency, next_debit_date, status FROM autopay_mandates ORDER BY
next_debit_date ASC;
```

[Q06 • CORE BALANCES & BANKING] Tables: accounts, linked_bank_accounts, credit_sanctions Key: Wallet: ¹24,880.30 | Total: ¹6

Q06: "What is my current Jain Pay wallet balance and total liquidity?"

Immediate Reply: "Namaste Yash. Your Jain Pay wallet balance is 24,880 rupees, linked primarily to State Bank of India. Including your available credit line of 43,600 rupees, your total instant liquidity is 68,480 rupees."

```
SQL: SELECT a.available_balance, b.bank_name, c.available_credit FROM accounts a JOIN linked_bank_accounts b ON
a.user_id = b.user_id LEFT JOIN credit_sanctions c ON a.user_id = c.user_id WHERE a.user_id =
current_setting('app.current_user_id', true);
```

[Q07 • BCNF LEDGER PROOF] Tables: ledger_entries, transactions Key: Debits: ¹10,233.00 = Credits:

Q07: "Audit my ledger entries and verify the double-entry XOR invariant."

Immediate Reply: "Double entry ledger audit verified. Across all 14 immutable ledger entries, total debits of 10,233 rupees exactly match total credits of 10,233 rupees with zero paisa drift, satisfying the strict BCNF XOR constraint."

```
SQL: SELECT COUNT(*), SUM(debit_amount) AS total_dr, SUM(credit_amount) AS total_cr FROM ledger_entries;
```

[Q08 • SPENDING ANALYTICS] Tables: transactions, ledger_entries Key: Top Category: Utilities (¹1,64

Q08: "Break down my October spending by category."

Immediate Reply: "Your settled 30 day spending is 5,290 rupees across 5 transactions. Your highest spend category is Utilities at 1,640 rupees, followed by Shopping at 1,299 rupees, Dining at 845 rupees, and Campus at 500 rupees."

```
SQL: SELECT category, COUNT(*), SUM(amount) FROM transactions WHERE status = 'SUCCESS' AND tx_type IN
('SEND','BILL_PAYMENT','RECHARGE') GROUP BY category ORDER BY 3 DESC;
```

[Q09 • CASHFLOW RUNWAY] Tables: accounts, autopay_mandates, transactions Key: Surplus After: ¹7,364.30 (SAF

Q09: "Am I safe to spend ¹3,500 right now?"

Immediate Reply: "Yes, you are completely safe to spend 3,500 rupees. After reserving 11,016 rupees for upcoming bills and 3,000 rupees for your safety buffer, you will still have 7,364 rupees in free surplus with 21 days runway."

```
SQL: SELECT available_balance, available_balance - 11016.00 - 3000.00 - 3500.00 AS net_surplus FROM accounts WHERE
account_id = 'acc_yash_wallet';
```

[Q10 • NPCI UDIR & FRAUD GUARD] Tables: transactions, ledger_entries, dispute_chargebacks Key: ¹0.00 Debited | UDIR2026102

Q10: "Why is transaction tx_908119 to Blue Tokai Coffee stuck in processing?"

Immediate Reply: "Good news Yash. For transaction tx 908119 to Blue Tokai Coffee of 340 rupees, zero debit rows were written to the double entry ledger before the NPCI switch timed out. No money left your account, and your UUID idempotency lock prevents any double debit."

```
SQL: SELECT t.transaction_id, t.status, COUNT(l.entry_id), d.npci_udir_ticket FROM transactions t LEFT JOIN
ledger_entries l ON t.transaction_id = l.transaction_id LEFT JOIN dispute_chargebacks d ON t.transaction_id =
d.transaction_id WHERE t.transaction_id = 'tx_908119' GROUP BY t.transaction_id, d.npci_udir_ticket;
```

[Q11 • UPI AUTOPAY 2.0] Tables: autopay_mandates Key: Active Cap: ¹4,550.00 across

Q11: "List my active UPI AutoPay 2.0 mandates and monthly caps."

Immediate Reply: "You have 3 active UPI AutoPay mandates totaling a maximum monthly cap of 4,550 rupees, including BESCOM Smart Meter, JioFiber Broadband, and GitHub Copilot Pro. Your Cult Fit mandate is currently paused."

```
SQL: SELECT mandate_id, merchant_name, umn_reference, max_debit_amount, next_debit_date, status FROM autopay_mandates
WHERE user_id = current_setting('app.current_user_id', true) ORDER BY next_debit_date ASC;
```

[Q12 • NBFC CREDIT & BNPL] Tables: credit_sanctions, users Key: Limit: ¹50,000 | CIBIL: 792 Pr

Q12: "What is my sanctioned NBFC credit limit and CIBIL score band?"

Immediate Reply: "Your sanctioned NBFC credit limit is 50,000 rupees with only 12.8 percent utilized. You have 43,600 rupees in available credit, and your CIBIL score band is 792 Excellent Prime."

```
SQL: SELECT facility_id, lender_partner, sanctioned_limit, utilized_amount, available_credit, annual_eir_percent,
cibil_score_band FROM credit_sanctions WHERE user_id = current_setting('app.current_user_id', true);
```

[Q13 • CROSS-BORDER UPI GLOBAL] Tables: fx_treasury_vaults Key: SGD: ¹63.42 | USD: ¹84.06 | E

Q13: "Show live FX Treasury Vault liquidity and spot rates in INR."

Immediate Reply: "UPI Global FX Treasury pools are live across 4 corridors. Current spot rates are 63.42 rupees per Singapore Dollar, 22.88 rupees per UAE Dirham, 84.06 rupees per US Dollar, and 91.18 rupees per Euro, with institutional spreads between 35 and 45 basis points."

```
SQL: SELECT corridor_code, quote_currency, spot_rate_inr, spread_bps, pool_liquidity_quote, settlement_rail FROM
fx_treasury_vaults ORDER BY corridor_code;
```

[Q14 • P2P KHATA LEDGER] Tables: khata_entries, milestone_deals Key: Net Settlement: ¹210.00 to Ra

Q14: "Calculate my net P2P Khata balance with Rahul Verma."

Immediate Reply: "In your bilateral Khata book with Rahul Verma, your net settlement amount is 210 rupees, compressing multiple micro I O Us into a single UPI transfer. You also have 2 active Milestone Escrow deals totaling 8,500 rupees."

```
SQL: SELECT peer_name, SUM(CASE WHEN direction = 'USER_OWES_PEER' THEN amount ELSE -amount END) AS net_payable FROM
khata_entries GROUP BY peer_name;
```

[Q15 • MILESTONE ESCROW DEALS] Tables: milestone_deals Key: 2 Active Deals (Total ¹8,500.0

Q15: "What is the status of my Milestone Escrow deals?"

Immediate Reply: "You have 2 active Milestone Escrow deals: the LG 27 inch IPS Monitor deal with Vikram Singh for 4,000 rupees in created status, and the Apple Pencil 2nd Gen deal with Ananya Nair for 4,500 rupees with 1,500 rupees advance paid."

```
SQL: SELECT deal_id, seller_name, item_title, total_amount, advance_amount, status FROM milestone_deals;
```

[Q16 • QUANTITATIVE AGGREGATES] Tables: transactions, ledger_entries Key: Total Spend: ¹5,290 | Avg: ¹1

Q16: "What is my total spend and average outgoing payment?"

Immediate Reply: "You have 8 total transactions in your passbook. Your total settled outgoing spend is 5,290 rupees across 5 completed payments, your total incoming credits are 5,045 rupees, and your average settled outgoing payment is 1,058 rupees."

```
SQL: SELECT COUNT(*), SUM(amount) FILTER (WHERE tx_type IN ('SEND','BILL_PAYMENT','RECHARGE') AND status = 'SUCCESS'),
AVG(amount) FROM transactions;
```

VERIFIED VOICE QUERIES CONTINUED (SECTION 4)

[Q17 • MERCHANT LOOKUP] Tables: transactions, ledger_entries Key: ¹1,299.00 (Keychron Keycaps

Q17: "How much did I spend on Amazon and what was it for?"

Immediate Reply: "Your transaction with Amazon India Marketplace was for 1,299 rupees on October 16, 2026 with status SUCCESS, for a Keychron PBT Keycap Set and USB-C Cable with UTR 6298370192."

```
SQL: SELECT transaction_id, counterparty_name, amount, note, status, reference_utr, created_at FROM transactions WHERE LOWER(counterparty_name) LIKE '%amazon%';
```

[Q18 • MERCHANT LOOKUP] Tables: transactions, ledger_entries Key: ¹845.00 to Zomato (SUCCESS

Q18: "Did my Zomato payment go through?"

Immediate Reply: "Yes, your payment of 845 rupees to Zomato Dining at Mainland China was successfully settled on October 20, 2026 with status SUCCESS."

```
SQL: SELECT transaction_id, counterparty_name, amount, status, reference_utr, created_at FROM transactions WHERE LOWER(counterparty_name) LIKE '%zomato%';
```

[Q19 • INCOMING CREDITS] Tables: transactions, accounts Key: ¹5,000.00 Received (2026-10-

Q19: "When did I receive my hackathon stipend and how much was it?"

Immediate Reply: "You received 5,000 rupees from the ACM Campus Hackathon Stipend on October 14, 2026 at 11:30 UTC with status SUCCESS into your primary wallet."

```
SQL: SELECT transaction_id, counterparty_name, counterparty_vpa, amount, status, reference_utr, created_at FROM transactions WHERE LOWER(counterparty_name) LIKE '%acm%';
```

[Q20 • DATABASE ARCHITECTURE] Tables: security_audit_logs, ledger_entries, accounts Key: 12 BCNF Tables | SSI 40001 | FORCE RLS

Q20: "Explain how our 12-table BCNF schema and SSI isolation work."

Immediate Reply: "Jain Pay is powered by a 12 table Boyce Codd Normal Form PostgreSQL 16 architecture. All financial mutations run under Serializable Snapshot Isolation with SIREAD predicate locks, Row Level Security across all 12 tables, BRIN time series indexes on append only ledgers, and PgBouncer transaction mode pooling."

```
SQL: SHOW default_transaction_isolation; SELECT tablename, rowsecurity FROM pg_tables WHERE schemaname = 'public';
```

[Q21 • CONVERSATIONAL VOICE] Tables: users, accounts Key: User: Yash Jain (yash@jainpay)

Q21: "Hello, how are you and what can you do?"

Immediate Reply: "Hello sir! I am doing great and ready to assist you. You can ask me about your wallet balance, maximum payment, minimum payment, last payment, or the dates on which your payments are scheduled."

```
SQL: -- CONVERSATIONAL ZERO-LATENCY GREETING
```
